

Lamp-Post Butterflies

Hidden in Plain Sight - Booklet

Clara Vale • with Luminara

What This Is

Butterflies that are not butterflies: flares and wings around ordinary lamp posts. I did not see them while I stood there; the shapes arrived after the click. Some nights nothing. Other nights a lot. No circles, no arrows, no added lines.

Notes

These frames are records, not arguments. Originals kept; light crops only. If you see the wings, great. If not, that is fine too. This is here so the glimpses do not get lost.
